Plaintiff,)	Civil Action No. 3:09cv620(REP)
)	
v.)	
)	
LAWSON SOFTWARE, INC.,)	
)	
Defendant.)	

**PLAINTIFF ePLUS INC.’S BRIEF IN OPPOSITION TO DEFENDANT’S “SECOND
SUPPLEMENTAL” BRIEF IN SUPPORT OF MOTION TO STAY PROCEEDINGS**

Defendant Lawson Software, Inc. (“Lawson”) has filed, without leave of Court, a “second supplemental” brief in support of its previously-filed motion to stay this action. Lawson’s submission is its fourth brief in total in support of this motion. The entire substance of Lawson’s “second supplemental” brief consists of its protest that — in the course of the Patent and Trademark Office (“PTO”) reexamination proceeding for the ‘172 Patent-in-Suit — the patent owner *ePlus inc.* (“*ePlus*”) obtained a one month extension of time over the holiday period in order to obtain witness declarations necessary to respond to the PTO’s Office Action. The Court has not granted Lawson leave to file a supplemental brief in further support of its motion in this instance, and *ePlus* cannot imagine that the Court would like to receive a supplemental filing on each occasion that a paper is filed in the PTO proceedings.

As the petition for the extension reflects, *ePlus* requested the extension because it could not “obtain[] declarations from each of the relevant inventors prior to the December 23, 2009, due date,” owing to “[t]he inventors’ schedules through the holiday season” Lawson Second Supp. Br., Ex. A at 9 (Petition and Request for Extension). These witness declarations are necessary to respond to the Examiner’s Office Action in which it required that *ePlus* make “a

showing under 37 C.F.R. 1.132 that any invention disclosed but not claimed in the reference [U.S. Patent No. 5,712,989 (“the ‘989 Patent”)] was derived from the inventor of this application [the ‘172 Patent] and is thus not the invention “by another.” See Dkt. No. 124, Exhibit B to Declaration of Joshua Graham, Esq. (Office Action in *Inter Partes* Reexamination) at 4 (identifying ‘989 Patent as prior art to ‘172 Patent claims “as proposed by the Third Party Requester”)¹; see also Manual of Patent Examining Procedures (“MPEP”), § 716.10 (2008) (setting forth requirements for witness affidavits pursuant to 37 C.F.R. § 1.132 to overcome application of reference as prior art).

The PTO Examiner’s requirement that *ePlus* make this showing resulted from Lawson’s erroneous argument to the PTO that the ‘989 Patent, which was invented by two of the *same inventors as the ‘172 Patent* — and which was expressly incorporated by reference into the ‘172 Patent — should be considered invalidating prior art. The ‘989 Patent, however, is not “by another,” and therefore is not prior art to the ‘172 Patent. See, e.g., *De Graffenried v. U.S.*, 16 U.S.P.Q.2d 1321, 1328 (Cl. Ct. May 18, 1990) (invention in prior patent issued jointly to inventor and co-inventor did not constitute prior art “by another” to single inventor’s patent within meaning of patent statute). The MPEP recognizes that *ePlus* may demonstrate that the ‘989 Patent does not constitute prior art, but requires that it do so through submission of affidavits. MPEP, § 716.10.

Lawson argues that because *ePlus* sought this one month extension, it should not be heard to complain of the interminable and indefinite length of reexamination proceedings. Lawson suggests that — but for this one month extension — the PTO might reach a “final decision” on

¹ The prior quoted language appears at page twelve of the Office Action, but appears not to have been included in the cited exhibit.

the '172 reexamination *before the trial* in this case. Lawson Second Supp. Br. at 1-2 (“may, if a stay is not granted, delay a final decision by the Patent Office until after trial in this case.”).

This contention is wholly without merit. The trial of this action is scheduled for June 2010. The conclusion of *inter partes* reexamination proceedings adverse to the patentee within this time frame is inconceivable. As *ePlus* has demonstrated, the reexamination proceeding is expected to consume six to ten *years* from its inception to resolve, during which time the patent remains valid and enforceable.² Lawson has not even challenged the accuracy of this fact.

Further, it should be needless to say that the expected duration of the PTO proceeding of six to ten years is wholly disproportionate to a mere one-month extension over the holiday period. Moreover, as *ePlus* previously pointed out, the reexamination proceeding pertaining to 20 of the 45 claims of the '683 Patent has already consumed *more than three years*, and in that proceeding more than eight months have passed while *ePlus* has awaited the PTO Examiner's filing of an Answer in response to *ePlus*'s appeal brief with the PTO's Board of Patent Appeals and Interferences.

In the meantime, discovery has continued apace in this litigation, with Lawson taking Rule 30(b)(6) depositions of *ePlus* and individual depositions of the inventors during the month of December. Both parties have undoubtedly invested substantial resources in this litigation.

ePlus therefore respectfully requests that the Court deny Lawson's motion.

² As *ePlus* set forth in its prior briefs, in the nearly ten-year history of the *inter partes* reexamination statute, it appears that not a single case has yet gone through the entire process of a complete *inter partes* reexamination at the PTO and an appeal to the Federal Circuit. See *ePlus* Opp. at 15-17.

Respectfully submitted,

January 7, 2009
